RAHUL SINGH

PRODUCT DESIGNER | UX RESEARCH AND PRODUCT ANALYTICS

Chicago, IL | (773) 394-3890 | rahuldash88@ymail.com | LinkedIn | Portfolio | Open to relocate

PROFILE

Product designer working across connected health and AI-assisted care products. Combines interviews, usability testing, and product analytics with interaction design to shape and ship mobile experiences.

EXPERIENCE

Product Designer | Ganance, Chicago, IL — Feb 2025 – Present

- Scaled HEIR, a screenless health wearable, across two device generations, 6+ app releases, and 3,000+ units sold by owning product strategy and interaction design across onboarding, Activity, Health, Insights, iOS widgets, and device settings.
- Reworked onboarding and Bluetooth pairing using an 84-response survey, interviews, tree tests, and funnel analysis; first-session activation rose 24% and median setup time fell 38%.
- Redesigned Insights navigation and activity views; usability testing with 30 users found over 80% task success, 20–25% faster completion, and a 75.7 System Usability Scale score.
- Designed Health Scan readiness, guidance, error recovery, and results for nine health metrics; first-pass scan success rose from 61% to 84% in initial usability testing.
- Partnered with app and firmware engineers on movement classification, pace, adaptive goals, and Daily Alignment; translated device constraints into scoring rules and user-facing feedback.
- Built reusable Figma components, interaction specifications, and chart standards for health trends and insufficient-data states across iOS and Android.

Product Designer | Lira Technologies, Chicago, IL — Aug 2025 – Present

- Used interviews with older adults and caregivers to focus the MVP on care coordination; mapped medication, appointment, and question workflows to shared summaries, tasks, and reminders.
- Designed the pendant-to-app journey from recording and AI summaries to editable actions and shared calendars; delivered a functional iOS demo with Google and Apple Calendar integration.
- Designed source traceability, confidence cues, and confirmation paths for AI-extracted actions to help users review and correct model output.
- Developed an eight-week field-study plan for 50 caregiving families, combining diaries, interviews, and Datadog events to assess everyday use and care-network coordination.

Product Designer | MytecSys IT Solutions, India — Jan 2021 – Dec 2022

- Simplified cooperative-banking applications through agent and borrower research, inline validation, and offline recovery; field-agent throughput rose 32% and incomplete applications fell 27%.
- Redesigned an artisan marketplace's discovery and checkout flows using Hotjar funnel analysis and A/B tests; cart-to-checkout conversion rose 18% and abandonment fell 23%.
- Created responsive components, annotated interaction specifications, and HTML/CSS prototypes for engineering handoff across banking and marketplace products.

EDUCATION

M.S., Human-Computer Interaction | DePaul University, Chicago, IL | Jun 2025

B.B.A., Marketing | Dr. Ambedkar Institute of Management Studies and Research | 2018

SKILLS

Design: Figma, interaction design, information architecture, mobile app design, design systems, data visualization, AI product design, accessibility

Research: Interviews, surveys, A/B testing, usability testing, diary studies, concept testing, card sorting, tree testing

Analytics and delivery: R (dplyr, ggplot2), SQL, Datadog, Mixpanel, funnel analysis, conjoint/max-diff analysis, statistics HTML/CSS/JS/React.
